

# Manual

Centro landing page. User enters a set of starting points, with some suggestions being displayed by the autocomplete. After hitting the "go" button, the user sees the first automatic suggestion for a meeting place.

A search including 3 starting points

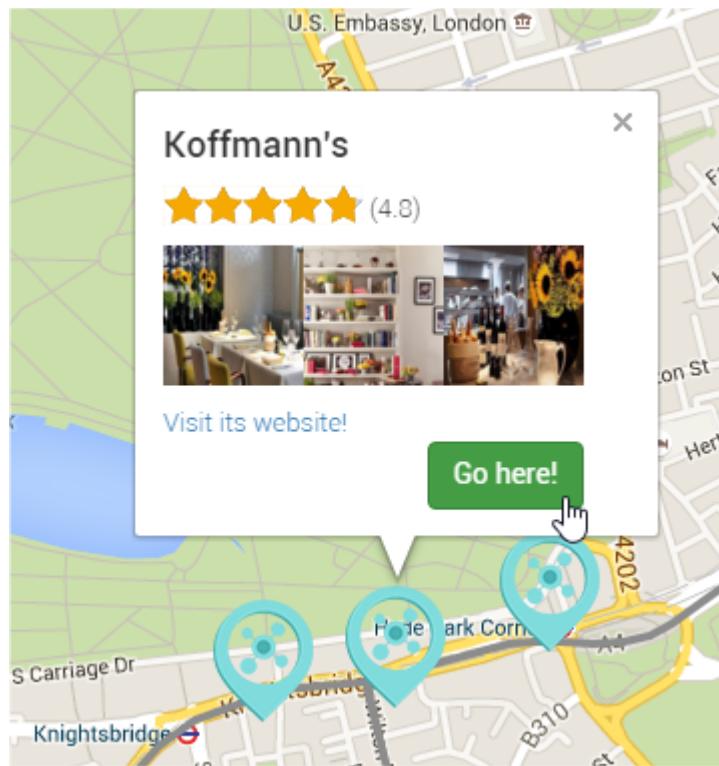

The results page of the previous search, showing the geometrical middle point (in yellow), the top5 of meeting places and routes with required time to reach the middle point for each attendee. On the left hand side, there's a customization panel, where users can adapt the parameters of the search, like transportation means for each attendee and maximum time for each attendee (in the "Starting Points" tab) or the type of the meeting place. In the end, the button "Recalculate" has to be pressed for a new search.

This screenshot shows the customization interface for setting starting points. It includes fields for entering addresses (e.g., Imperial College Rd, London SW7, Royaume-Uni) and selecting mean of transportation (Driving, Walking, Cycling, Public transportation) along with their respective max-times. A 'Recalculate' button and a 'Save/Share my search!' button are at the bottom.

Starting Point Address	Mean of transportation	Max-time
Imperial College Rd, London SW7, Royaume-Uni	Driving	---
WC2E, Royaume-Uni	Walking	---
Pimlico, London, Royaume-Uni	Driving	---

Customization options in the Centro interface.

A place information window. A click on the “Go here” button will switch the routes from the middle point to this meeting place allowing you to know distances/travel time from each starting point
